THEIR PART.**

Let us help you take it from there!

Introducing The Rubber Fab Dairy Line of Sanitary Seals and Tubing

Tabbed O-Ring

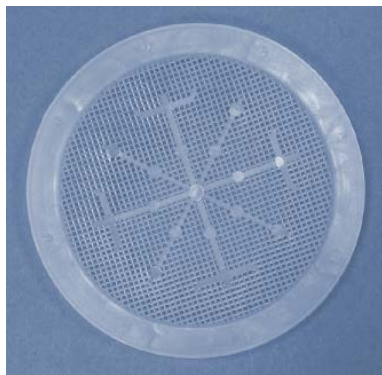

Rubber Fab's tabbed o-ring securely fastens fabric milk filters to inline and side discharge stainless steel strainers for the dairy industry. The o-ring is designed to be used multiple times during the fabric filter removal and installation.

- Available in EPDM
- Can handle fatty acids that are found in milk
- Fits a 3" filter
- Tab is engraved with RF

Coming Soon!

Dairy Transfer and Twin Vacuum Tubing that is engineered to address specific needs of dairy farmers who work with raw milk.

Dairy Pipeline Filter Screen

Rubber Fab's Dairy Pipeline Filter Screens are the perfect solution when it comes to transferring milk or other dairy product from a tanker truck to your facility. These screens are designed to help keep milk free of sediment.

- Available break resistant, low-density, natural color polyethylene (LDPE)
- For 3" Bevel Seat Fitting
- For reverse flow - transferring milk from a tanker
- Monitors sediment every time a tanker is unloaded
